

MATH 4 SUCCESS

Table of Contents

LEVEL 22

1. Naming Opposites of Rational Numbers (additive inverses)	3	
2. Simplifying Inequalities Involving the Symbols	7	
3. Adding and Subtracting Rational Numbers	12	
4. Multiplying Rational Numbers	17	
5. Dividing Rational Numbers	23	
6. Properties of Corresponding, Vertical, Alternate Exterior,	29	
Alternate Interior, and Supplementary Angles		
7. Solving Equations by Inspection	36	
8. Determining Absolute Value	42	
9. Proving Triangles Congruent by ASA, SSS, SAS	47	
10. Translating Word Sentences into Number Sentences	54	
11. Specifying Sets using Set-Builder Notation	59	
12. Using Greatest Integer Notation	64	
13. Determining whether a given Set is closed for a specified operation..	67	
14. Solving Equations using the Addition Property of Equality	70	
15. Pre-Test	Answers to Pre-Test	75
16. Post Test	Answers to Post Test.....	83
17. Class Record		94
18. Drill and Practice		91

Math 4 Success

TABLE OF CONTENTS

LEVEL 23

1. Probability Combined Events	97
2. Multiplying powers of 10 with positive integral exponents	103
3. Dividing powers of 10 with positive integral exponents	108
4. Geometry: Computing surface area and volume of prisms and pyramids	113
5. Solving Equations using the multiplication property of equality	118
6. Extending the powers of 10 to include those with negative or zero. integral exponents	124
7. Multiplying powers of 10 with integral exponents.....	129
8. Dividing powers of 10 with integral exponents	134
9. Geometry: Identifying parts of cones, cylinders and spheres	139
10. Using equations in one variable to solve word problems	146
11. Extending conversion within the metric system.....	151
12. Expressing rational numbers in scientific notation	154
13. Adding and Subtracting exponential expressions	157
14. Using Scientific Notation to simplify products	162
15. Using Truth Tables : Logic	165
16. Pre-Test Answers to Pre-Test	170
17. Post Test Answers to Post Test	179
18. Class Record	168
19. Drill and Practice	188

Math 4 Success

TABLE OF CONTENTS

LEVEL 24

1. Using Unit Fractions of Exponents	192
2. Computing the surface Area of Cones, Cylinders, and Spheres	179
3. Solving Equations Involving Absolute Value	204
4. Identifying Significant Digits	209
5. Developing the set of real numbers	214
6. Comparing Real Numbers	223
7. Adding Real Numbers. Using Rational Approximations	228
8. Finding the Volume of Cones, Cylinder, and Spheres	223
9. Graphing Intervals of Real Numbers	239
10. Solving Inequality in one Variable	245
11. Converting to Metric Units of Volume	250
12. Reading Radical Expressions	255
13. Using Order to Estimate Square Roots	258
14. Calculating Square Root by the "Divide and Average" Method	261
15. Graphing Compound Inequalities	264
16. Solving Equations in Two Variables	267
17. Relating Probability to Statistics	270
18. Pre-Test Answers to Pre-Test	280
19. Post Test Answers to Post Test	292
20. Class Record	276
21. Drill and Practice	273
